

Zürich-Airport, 2011

Staff parking - General information on refurbishment and construction work P6

Background

From February 2011 until presumably end of 2013 refurbishment work will be conducted in the car park P6.

Due to the refurbishment work, up to three parking stories will be closed simultaneously in the car park P6. The Flughafen Zürich AG cannot guarantee that the car park P6 will not be fully occupied occasionally and that the users of P6 have to use another parking facility at the airport.

Additionally the construction work for the enlargement of the car park P6 as compensation for the car parks P5 and P40 has begun (land clearing for the project "The Circle"). These construction works implicate further closures of parking spaces in the car park P6.

Staff with permanent parking cards, day parking cards and rechargeable parking cards:

On arrival, you must observe the car park guidance system for staff (Fig. 1). If the car park P6, for which staff parking products normally can be used, is full, drive directly to the car parks P1, P2, P3, P40 or P5. In this case, the entrance barriers to the car park P6 cannot be opened with staff parking products .

Flight crews with permanent parking cards, temporary permanent parking cards, day parking cards, multi day parking cards and rechargeable parking cards:

Flight crews are not affected by the above stated regulation until 31 December 2011 and can use the car park P6 even if it is closed for other staff (Fig. 1).

On arrival, you must observe the car park guidance system for passengers (Fig. 2). If the car park P6 is indicated **besetzt**, drive directly to the car parks P1, P2, P3, P40 or P5. In this case, the entrance barriers to the car park P6 cannot be opened with staff parking products.

In addition for all holders of staff parking products, the conditions and regulations according to the respective information sheet for staff parking products, which are published under www.zurich-airport.com/staffparking , apply.
